

Extremely Configurable PPM Software Get the Solution You Need and Deserve!

From Company Strategy to Project Execution.

Intuitive Project Portfolio Management tools to identify which project delivers value or not to the organization in order to initiate, prioritize or stop the correct Projects and Programs. Combine financial, qualitative and strategic analysis in a Single Cloud PPM Software.

Create strategic plans to identify, list, prioritise and share enterprise goals and initiatives.

Triskell is the only company-wide Saas solution on the Project Portfolio Management market today that offers you all the flexibility and capabilities to:

- Break any business strategy down into multiple portfolios and organizations.
- Dynamically prioritize, fund and staff initiatives and actions according to strategic targets, as well as available budgets and resources.
- Plan work and schedule your resources in a standard or agile mode.
- Dynamically control execution and progress on several axes and identify the potential gaps with the original targets.
- Re-align periodically strategy and execution.

SaaS Project Portfolio Management.

SaaS Project Portfolio Management to get the real-time pictures of your organisation and resources Focus on the right projects; make the right decisions; which project to start and which one to stop. Have a clear view which project delivers value to your organisation.

Increase Visibility, Monitor Progress, Provide visibility for Executives. Triskell PPM-Factory's top-down approach to Enterprise Project Portfolio Management ensures that PMOs and Executives have the right tools.

Portfolio Monitoring and Planning

Thanks to **Triskell's PPM-Factory** easy-to-use Masterplan, Project and Initiative Scoring and Powerful Scenario Definition and Simulation, you can ensure you are taking on the right projects.

Get Portfolios and Projects under control

Minimize discrepancy failure by gaining complete control over your project deliverables. Identify potential problems early in the project and provide the visibility to take corrective action before any resourcing or financial impact can occur.

Get the full picture and drill-down into details

Triskell PPM-Factory provides a single and consolidated view of any project, program, and portfolio status to improve governance by allowing executives, portfolio managers as well as project managers to make better project decisions.

Resource Management.

Triskell PPM-Factory's unique Resource Management solution help Resource Managers to have full overview of your resources workload and demand.

Triskell PPM-Factory Resource Management. The right People – Doing the Right Things to support your business strategy.

Resource Capacity Planning

Top-Down Resource Allocation allows you to start planning the supply and demand of generic resources (Developer, Technician, Engineer, etc.), rather than named resource at Portfolio, Program or Project level. This way you have a clear understanding of overall resource constraints and costs, without having to jump into Project plans and execution details.

Ensure accurate project planning

Triskell PPM-Factory provides Resource Managers with a consistent approach to projects and resources planning processes, with the detail of tasks and the resources involved. It provides a clear link between Capacity Management and effective resource assignment in project planning.

Easy to use Macro and detailed Project Planning Tools

Improve your Planning using **Triskell PPM-Factory** high-level resource demand management tools with detailed project planning using Gantt Chart or Agile framework.

Clear Resource Workload Tracking

Go beyond standard Project Portfolio Resource management, tracking resource workload across the whole organisation including project and non-project activities.

Budget Management & Cost Tracking.

With Triskell PPM-Factory's Financial Management capabilities, you can manage your company's portfolio with real-time visibility into financial performance from budgeting through collection of actual costs.

Triskell PPM-Factory provides robust financial management capabilities to support project -and portfolio- level budgeting and planning.

Gain Complete Control over Project Financials

Triskell PPM-Factory provides complete visibility and control over your Portfolios, Programs and Project financials. Get a clear view of actual costs and expenditure and compare it with the forecast to quickly identify any discrepancies. It creates the transparency required to accurately measure ROI.

Get Visibility into Investment Performance

Triskell PPM-Factory allows you to get a clear view into the downstream performance of your investments. Easily compare planned expenditure to actual gives you total control and flexibility to simplify Portfolios reorganization and investments shifts according to the new situation.

Optimize Resources Costs

Triskell PPM-Factory allows you to allocate resources more strategically, maximize billable time, and closely control – and report on – your costs.

Agile Budgeting Process

When it comes to the budgeting process, **Triskell PPM-Factory** meets the needs of all those involved. **Triskell PPM-Factory** provides these roles with clear and precise information relating to their budgeting requirements, funding decisions and expected benefits from investments and projects.

Master Plan & Gantt Chart.

With Triskell PPM-Factory visual planning tools you allow Project Managers to immediately see the entire life-cycle and time-line of the project, significantly reduce project administration and reporting times.

Triskell PPM-Factory Easy-to-use Master Plans for clear overview of Strategy and Portfolio Execution time line with Powerful Gantt Chart for easy Project and Resource Planning.

A Complete Picture of Resource Usage and Costs

With **Triskell PPM-Factory** you know who is working on what, and how much it costs. A complete picture of resource usage and the financial implications (including budgets, costs and margins) can be identified from the many dashboards and reports delivered by the system.

Timesheets to support Portfolio and Project life cycle

Triskell PPM-Factory timesheet features go beyond simple time booking. Users can enter the estimate to complete (ETC) per day for agile management. Any timesheet detailed timesheet entry can be commented, and history of changes (values and status) is automatically kept by the system.

Time Booking on any objects

Triskell PPM-Factory allows users to book times not only on scheduled tasks as most of the other products but also on any object like deliverables, risks, issues and tickets. Timesheet displayed by week or month (one full week or one full month) and Time entry by day, week or month (i.e. a value per day, per week or per month).

Collaboration & Workflows.

In today's world communication and collaboration are in the center of everything. **Triskell PPM-Factory** provides the right to stay on top of your portfolios and to share strategy and updates with everyone in or outside your organization.

To stay on top of everything you need to be informed and be able to share information.

Costs Add and share rich comments

Triskell PPM-Factory advance comment management allows starting multiple forum discussion on any piece of information to achieve real collaboration.

Triskell keeps you informed

Thanks to **Triskell PPM-Factory** alerts and email notifications you can get warnings and reminders when necessary. The information comes to you.

Lifecycles & Workflows

Every object in **Triskell PPM-Factory** has its own workflow, from the simplest one (active / non-active) to the most complex one. For example, you can define workfloes on projects, work packages, products, risks, deliverables, contracts and any other object you create.

Workflows - Lifecycles include:

- Stages with control of the roles, attributes and features accessible at that stage (in combination with the user role on the object).
- Transitions between stages with mandatory documents and comments.
- Transitions can be controlled by role, so that only certain roles can advance an object from one stage to another.
- History of lifecycle changes for accurate tracking.

Triskell Enterprise Portfolio Management System.

A Real Enterprise Solution. Triskell PPM-Factory provides an extremely flexible and powerful way to manage different business objectives into a single platform. Your organization can create, analyse, combine, add, and link different portfolios and each maintain a repository of objects completely different.

Much more are standard PPM ! « Because Managing Project isn't not enough. You need to integrate people and departments and their business needs and management systems! »

Ultimate Flexibility – Any kind of Portfolio

Triskell PPM-Factory has been designed to let you modelise your own Portfolio Management system to manage:

- Any kind of project, portfolio, or program...
- Any business; project methodology.
- Any workflow to support your own business flow.
- Any kind of business object with as many attributes as you want.
- For anyone in the enterprise.

One Tool For Everyone, The Real Enterprise Portfolio Management

PPM • FACTORY

An end-to-end Solution, from strategy planning to execution, and Portfolio and Performance management.
